## Skills

- Python, Django
- MySQL, PostgresSQL, SQLite
- REST API
- Java, Node.js, Express JS
- AWS, Nginx

## Projects

**MIBPS SCHOOL WEBSITE** – Client Project                                      April 2022

- Developed a live website for a client using Django, hosted on AWS EC2. Implemented user authentication, optimized performance, and ensured a responsive, mobile-first design, resulting in a 30% increase in user engagement. Implemented using Python Django framework

**ENGLISH LEARNING PLATFORM** – College Project – Marian College                 June 2024

- Developed an English learning platform using Django, NLP, and Google's Speech-to-Text API for pronunciation. Created personalized lesson plans for each user, enhancing learning outcomes through tailored content and real-time feedback.

**SKINLUXE (ONLINE ECOMMERCE WEBSITE)** – College Project – Marian College         March 2024

- Developed an online store for skincare products using the Django framework. Implemented secure payment processing, user authentication, and a user-friendly interface. Integrated Chart.js for sales analytics, enhancing the shopping experience and boosting sales.

## Certifications and Trainings:

**DATA ANALYSIS WITH PYTHON** – Cognitive Class – Online                      September 2023

**MACHINE LEARNING WITH PYTHON** – IBM – Online                                October 2023
